INDUSTRIAL

# Features & Benefits

**Super Concentrated Industrial Floor Care Program is an innovative, compact, high volume chemical dispensing program designed specifically to deep clean surfaces and concrete substrates in industrial warehousing. Ideal for fast filling ride and walk behind auto scrubbers.**

## Financial

- Lowest ready to use cost, using super concentrates with dilutions up to 1:600
- 50% labor savings using our 5, 7 or 9 GPM (gallon per minute) fast fill wall mounted compact dispenser
- Reduces freight costs by eliminating the need for large truck and trailer delivery of drums and totes
- Lowers the cost of labor reducing handling times on docks and store rooms

## Sustainability "caring for our future today"

- Super concentrate formulas up to 1:600 reduce packaging – 90% less plastic in landfills
- Accurate dilutions every time at the simple turn of a lever reduce the over use of product, inconsistent cleaning results and spend
- Easily recycled 18.9L/5 gal concentrate container lowers plastic waste in the landfill
- No corrugate packaging used, lowering waste in landfill
- Lowers energy costs as it does not require electricity to dispense product

## Employee Wellness & Safety

- No chemical contact inserts ensure employees do not touch or handle concentrate liquids
- Eliminates the need for handling extremely heavy drums and totes lowering injury and risk
- Concentrate containers weigh approx. 40 lbs each
- Secure wall mounted dispenser eliminates installing exposed drum pumps, faucets and measuring devices
- UN approved containers ensures safer, leak free packaging
- Product selection, dilution and cleaning charts with trilingual instructions make it easy to select the correct product

## Concentrate Comparisons

**1 X 18.9L (5 gal) Super Concentrate Container produces the equivalent product yield of 208 L (55 gal) or more**

***Super Concentrated = Super Sustainable***

The diagram illustrates the volume equivalence between a small concentrate container and a large drum. On the left, a small white plastic container labeled '18.9L/5 gal Super Concentrate' is shown next to a compact wall-mounted dispenser. A blue equals sign is placed between this and a large black drum labeled '208L/55 gal Drum'. To the right of the drum, a list of benefits is provided: 'No chemical contact', 'Eliminates risk of chemical contact or exposure', and 'Secure, lockable wall mounted wire rack'. Further right, a black wire rack is shown holding a white plastic container. To the right of the rack, the text 'No chemical contact safety cap' is displayed. On the far right, a close-up inset image shows a hand opening a white plastic cap.

- No chemical contact
- Eliminates risk of chemical contact or exposure
- Secure, lockable wall mounted wire rack

No chemical contact safety cap

# Products

## ES700 Concrete Care Cleaner

- Innovative formula designed to deep clean concrete surfaces, enhancing the sheen
- Contains micro densifiers that strengthen the substrate, lowering dust and flaking
- Deep cleans resulting in approved appearance.
- Low odor and leaves no sticky residue
- Dilution ratio from 1:128 to 1:256

Sku: ES700-18

## ES701 Citrus Cleaner & Degreaser

- Contains a powerful synergistic solvent mixture complete with D-Limonene
- Emulsifies greasy soils and penetrates to remove dried or baked on soils
- Dilution ratio from 1:200 to 1:600

Sku: ES701-18

## ES702 Heavy Duty Alkaline Degreaser

- Exceptional industrial strength heavy duty alkaline degreaser
- Formulated to remove most soil loads found in industrial facilities.
- Low odor
- Dilution ratio from 1:100 to 1:400

Sku: ES702-18

## ES703 Tow Motor & Tire Mark Remover

- Removes tire and tow motor marks on most concrete and metal surfaces
- Penetrates and loosens dried soils
- Also great for use inside highway trailers
- Dilution ratio from 1:40 to 1:200

Sku: ES703-18

## 512 Sanitizer/Disinfectant

- An effective sanitizer that has broad spectrum action, a long active life, is safe, has a low odor and is economical
- This product deodorizes those areas which generally are hard to keep fresh smelling
- Also a registered disinfectant at 1:128
- DIN: 02255154, EPA: 1839-86-68138

Sku: ES512-18

# Dispenser

Sku: DSP-ESIND-1

## Dispenser Features:

- High-Flow Dispenser fills auto scrubbers and other large reservoirs at 5, 7 or 9 gallons per minute (18.9L/5 gal, 26.5L/7 gal or 34L/9 gal per min.) to reduce fill time over traditional dispensers.
- Features a ¼ turn ball valve activation and vacuum breaker for backflow protection.
- The stainless steel cover provides durability and a large area for product identification.
- We recommend a ¾ inch water supply or conventional ½ inch supply that flows a minimum of 5GPM (26.5L/7 gal) at 40 psi (2.8 bar) water flow and pressure to operate properly.
- Includes 10' x 1 1/2" discharge hose
